Air Mail Will Cut Letters Time

Mail schedules from here to Vancouver and from here to Winnipeg will be clipped in half when the new air mail schedules go into operation in September, according to Mr. H. Morgan, local postmaster.

It is just an overnight matter, that is, if a Vancouver bound letter is written and mailed before the south bound mail at five p.m. The letter will leave Calgary on the 6:55 p.m. train for Lethbridge, staying over until the plane arrives from Winnipeg at 2:27 o'clock the next morning, jumping off again for Vancouver at 4:42 a.m. It will be only two hours and forty minutes run from Lethbridge to Vancouver by plane, the mail arriving in the coast city at 5:22 a.m. (P.S.T.), in time for the first city delivery, which will be a saving of a full day.

Mail leaving Calgary for Winnipeg by air at night will arrive in that city at 4:33 o'clock the following morning, in time for the first delivery. At present, it would not arrive until six o'clock the following night, meaning it would not be delivered that day.

A day will also be gained by mailing letters air mail to Toronto, Montreal and Halifax.

Letters will be carried anywhere in Canada or as far as England and throughout that country by air mail at the rate of six cents for the first ounce and five cents for each additional ounce. Mail going from this country to the United States will be carried at the straight rate of six cents for each ounce.

Evangelical Church Notes

We will observe Labor Day next Sunday and the pastor will speak from the subject, "The Blessing of Labor." The evening subject will be, "The Grace of Kindness."

Pay Hail Loss On November 1

All hail claims against the Hail Insurance board for losses of 30 per cent, or less will be paid on November 1st, while those greater than 30 per cent will be met on November 1st, and April 1st next year, one half of the claim on each date, F. A. Hennig, manager, has announced.

Since adjustment of loss is not yet completed, the amount will not be known for some time, Mr. Hennig stated, but 2,060 claims have been made against the board to date. These range from the minimum, 10 per cent, to 100 per cent, he said, a fairly large proportion being total loss claims.

Farmers will pay their premiums on delivery of their crop to the elevator, where amounts owing the board will be deducted. Some farmers, however, are making payments now.

Canadian Legion Memorial Service

The annual Memorial Service in honor of those who gave their lives in the Great War will be held at the Butte on Sunday, September 11th.

All returned soldiers are asked to join the members of the Canadian Legion in the parade to the memorial.

Rev. N. W. Whitmore, of Olds, will conduct the service and give an address.

NOTICE

To Relatives of Persons on the Assessment Roll and to Tenants.

Notice is hereby given that during the months of September and October, applications may be made under the provision of Section 188 of the Town and Village Act for inclusion in the voters' list of the Town of Didsbury by the following persons, namely:

The wife, husband, father and mother and every son and daughter of any person whose name appears upon the assessment roll who are entitled to be placed upon the said list:

- if he or she is resident within the town or assists him in a business in respect of which he is taxable; and
- if he or she is of the full age of twenty-one years; and
- if his or her name does not already appear on the roll; and

tenants who have rented an assessed parcel for a period of twelve months immediately preceding the last day of August of this year; and the wife, husband, father and mother and every son and daughter of tenants who have made application as aforesaid.

W. A. Austin,
Secretary-Treasurer.

Object To Change In Duck Season

At the meeting of the Didsbury Fish and Game Association held on Monday evening, objection was voiced to the change in the duck season, the opening of which is two weeks later than previous years.

The claim is that although there is still 60 days shooting the season has virtually been curtailed two weeks by the reason that the ducks have generally all left this district by the first week of November.

The members of the association are asked to consider the matter and decide whether it is advisable to present a resolution to the convention of the Alberta Fish and Game Association with regard to the change.

Celebrates 90th Birthday.

Mrs. A. K. Franklin, who resides in East Didsbury, quietly celebrated her 90th birthday on Friday last. Her son, Mr. Sam Franklin and family, had dinner with her.

We congratulate Mrs. Franklin and wish her many more birthdays.

BIRTHS

Didsbury General Hospital.

August 22, to Mr. and Mrs. Ruben Rodney, a son.

Hard Surfacing Alberta System

Some 200 miles of Alberta highways have been given bituminous surfacing this season, according to an official report received by the Alberta Motor Association from the provincial public works department.

Started earlier in the year, many of these bituminous surfacing projects have been completed, leaving only a few to be finished in the next few weeks.

The "seal coat," which is second course surfacing, has been laid on an extensive portion of the main highway system this year. Stretches between Edmonton and Millet, Calgary to Banff and Calgary to Okotoks, have been included in the "seal coat" program.

The public works department also has been engaged with 127 miles of gravel-surfacing and 66 miles of grading, all forming part of the current season's program.

Given fair weather conditions the program undertaken last spring and this summer will be completed shortly, according to officials of the public works department.

Thus the provincial highway system is being improved to make Alberta all the more attractive to the motor tourist.

"Huns" Only Bird On Open List

Opening of the upland game bird shooting season this year on October 1st, the same date that waterfowl shooting in southern Alberta commences, will find local sportsmen obliged to be content with Hungarian partridges. At that they will be better off than hunters in northern portions of the province, for the "Huns" may only be hunted south of the North Saskatchewan River. The season will terminate on November 30, when duck and geese shooting closes.

Announcement of the 1938 regulations by W. H. Wallace, fish and game commissioner, reveals several important changes from 1937. In addition to Hungarian partridges, ruffed grouse were on the "open" list last year. This year they are closed, making it unlawful to shoot any of the grouse family. The bag limit for "Huns" has been reduced from fifteen to ten daily, with the season limit still remaining at 200 birds.

Knox United Church Notes.

Services next Sunday will be at the usual hours, namely:

Westcott at 11 a.m.
Westerdale at 2:30 p.m.
Didsbury at 7:30 p.m.

The sermon topic will be "The Heart of the Gospel." A cordial welcome is extended to all to attend Sunday School and the Church service.

Automatic Stoker Installed at School

During the vacation a large Riadon Automatic Stoker has been installed at the Didsbury School. This stoker will feed coal into the boiler and as it is thermostatically controlled it will keep the school at an even temperature at all times. The stoker is not only a labor saver but is expected to make a great saving in fuel costs.

The contractors, R. A. Craig & Son of Olds, have undertaken to heat the school at the same cost as at present for a period of five years and at the end of that period it is expected that the stoker will be paid for. They have installed two stokers in the Olds School on the same basis.

The Riadon Stoker is made to fit household furnaces and Frank Kaufman has been appointed agent for the Didsbury district.

Elects Officers.

At the recent annual meeting of the W.C.T.U. the following officers were elected:

President, Mrs. H. M. Reiber
1st Vice-Pres., Mrs. C. J. Hallman
2nd " Mrs. D. M. Sinclair
3rd " Mrs. A. Deadrick
Recording Sec., Miss Z. Cressman
Corresponding Sec., Mrs. A. Gole
Treasurer, Mrs. W. H. Chamberlin

The Fate Of Democracies

Shrouded in obscurity though the ultimate outcome may be, the future destinies of the democracies in a world riven with external strife and internal struggles, will be determined by the prevailing viewpoint of a mass of individuals comprising those nations who pin their faith to the doctrine of self-government.

The die may be already cast for those countries which adhere to the democratic ideal, who believe in and practice freedom of thought and speech and the right of the individual to govern himself, but before their future can be predictable with any reasonable degree of certainty, cohesion of thought and action must develop and objectives must be crystallized in the public mind.

When a world horoscope is attempted one may well say: "Now we see through a glass darkly", but if trends of thought and utterance are an indication of future status, within a few years the enveloping haze may clear and the goal stand out in sharp definition, sufficiently clear cut to hew a straight course. When the milling of the multitude has ceased and the chaos of ideas has merged into a distinct channel, then, and not until then, will it be possible to say whither we are heading.

Straws May Show The Way

What direction this channel, when it becomes defined, will take, it is difficult at this juncture to state, but once in a while someone expresses a thought which may give direction. Such a one is the Attorney-General of Australia, R. G. Menzies, who recently gave utterance in London, England, to suggestions which might possibly be regarded as a straw showing which way the wind may blow, or even as a milestone on a broad highway, to a specific objective.

The basic idea behind Mr. Menzies' utterances is unification of the ideals, purposes and policies of the integral parts of the British Empire, founded on a better understanding by the peoples of these units of one another's aspirations and objectives. And the achievement of this result he suggested would have to be based upon two elements, which he outlined as follows:

"1—A government in Great Britain which recognizes that on all large matters, particularly those of international policy, it is speaking, in fact, not only for the inhabitants of these islands, but for British people all over the world, and, therefore, realizes that it must, as far as possible, before arriving at any decision, invite dominion criticism and attach proper weight to dominion views:

"2—The governments in each of the dominions which realize that as members of a closely-knit family of nations they are responsible, not only for the wise handling of their own problems and policies, but also for an effective contribution to a wise Empire policy and real Empire security.

"In other words", said Mr. Menzies, "let us all realize that the independence of each of us is to some extent dependent upon the independence of the others. Let us more and more think in terms of British unity and how we can make it an effective instrument for peace and justice in the world."

The Danger Of Sectionalism

With dictatorships of one sort and another apparently flourishing in some parts of the world and warlike aggressiveness ruling the roost in other sections of the globe the question of security for peace-loving democracies may at any time become a vital issue, but such security cannot be built up overnight and to be effective and enduring it must be based on complete understanding and unity of purpose.

To give point to the assertion one is reminded of the fable of the old man who called his sons together as death approached and urged them to pool the resources he was leaving them, pointing out that if they stuck together no harm could befall them. He illustrated his precept by handing each of them a bundle of sticks bound together with instructions to break them. The boys found it was impossible to do so, but when the sticks were separated they were snapped assunder with ease.

An effective unity cannot be built up if the elements which should comprise it are isolationists or are engaged in the promotion of sectionalism, provincialism or even a narrow nationalism. As Professor A. R. M. Lower of Wesley College, Winnipeg, aptly expressed it at a recent conference on economics and politics: "A proper degree of civic pride is good, but when it goes too far it becomes parochialism and endangers the nation's integrity." Similarly in a wider field he might well have pointed out that a narrow nationalism endangers Empire integrity and the destruction or impairment of Empire integrity, is an equal threat to the security of its component parts.

Nearly all of Canada's commercial crop of grapes is grown in the Niagara Peninsula, Ontario.

WILSON'S
FLY PADS
REALLY KILL

One pad kills flies all day and every day for 2 or 3 weeks. 3 pads in each packet. No spraying, no stickiness, no bad odor. Ask your Druggist, Grocery or General Store.

Had Long Distance Memory

"Can you cast your mind back to the days before the war when women were still without the right to vote?" asked Holmes.

"I can," replied Gray.

"Do you remember how amazed everyone was when Bleriot succeeded in flying the Channel?"

"I should think I do!" said Gray.

"Can you recall still earlier the night news was received of the relief of Mafeking?"

"Oh, rather! What a night!"

"Do you remember," said Holmes impressively, "that a fortnight ago I lent you five dollars?"

"I'm sorry, old chap," apologized Gray, "but, to tell you the truth, I had clean forgotten."

Our present paper making methods are an evolution of the ancient Chinese methods.

Tribute To Old Liner

New Mauretania Name Plates Were Veiled Until Launching

For all its sturdy reserve the Cunard Line frequently amazes us with a sudden touch of sentiment, says Robert Wilder in the New York Sun. We are really coming to believe that the directors are just a bunch of old softies at heart.

When the Mauretania was launched the name plates on her bows were veiled. This, if you have ever attended a launching, is an unusual touch—most of the lines being satisfied with the getting of their ships down the ways. Before Lady Bates touched the button which sent the new Cunarder into the water she pulled a tassled cord, dropping the veils from the brass letters, covered until that moment as a tribute to one of the greatest of ocean grey hounds, the old Mauretania.

We tried to find out what became of the plates from the liner's namesake, but didn't have much luck. Cunard told us that one man had purchased a complete set and that the other was sold piecemeal one letter going here and another there. We, together with the line, would like to know who has them.

Not A Bad Idea

If Radio Sets Could Be Equipped With Earphones

This letter by S.O.S. appeared in the New York Sun:

The loud-mouthed radio being a topic of conversation on all sides, it occurs to me that if radio sets were provided with outlets for earphones listeners who wished to tune in on some sane program could plug in and escape the goofy din coming from the morning, noon and night jitter bugs.

These disturbances are akin to the pests who, rather than get out and ring a doorbell, honk their auto horns on Sunday mornings when most of us are just about to turn over for another snooze. A plague on both their houses.

Broadcasting stations could start a be-kind-to-your-neighbor-week and coax these noisy boobies to try the "thrilling sensation" of loud noise plus radio privacy obtained by the use of earphones, and if some Hollywood idol endorsed the movement the fad would sweep the country like wildfire.

SELECTED RECIPES

CHOCOLATE SPONGE CAKE (Four Eggs)

4 squares Baker's Unsweetened Chocolate
1/2 cup sugar
1 cup milk
1 teaspoon vanilla
1 1/4 cups sifted Swans Down Cake Flour
2 1/2 teaspoons Calumet Baking Powder
1/2 teaspoon salt
1 cup sugar
2 tablespoons water
4 egg yolks
4 egg whites, stiffly beaten

Add chocolate and sugar to milk in double boiler, and cook 10 minutes, or until smooth and thick, stirring constantly. Cool, covered. Stir occasionally. Add vanilla.

Sift flour once, measure, add baking powder, salt, and 1/2 cup sugar, and sift together three times. Add water to egg yolks and beat with rotary egg beater until thick and lemon-colored. Add 1/2 cup sugar gradually, beating until very thick—about 5 minutes. Fold in flour, alternately with chocolate mixture, 1/2 at a time, adding chocolate mixture last; then fold in egg whites. Turn into two slightly greased 9-inch layer pans. Bake in moderate oven (350 degrees F.) 30 minutes, or until done. Spread Bittersweet Filling between layers and Orange Frosting on top and sides.

BITTERSWEET FILLING

2 squares Baker's Unsweetened Chocolate
4 tablespoons sugar
1/2 cup milk
2 egg yolks
1/2 teaspoon vanilla
Melt chocolate in double boiler. Add sugar and blend. Add milk very gradually, stirring after each addition until smooth and blended. Add egg yolks, one at a time, beating well after each. Continue cooking and stirring 2 to 3 minutes, or until thick enough to pile up slightly. Add vanilla. Cool, stirring occasionally. Makes enough filling to spread between two 9-inch layers. Double above recipe for enough filling to spread between three 9-inch layers. For all-chocolate cake, spread between chocolate layers and spread any favorite chocolate frosting on top.

In Ecuador earthworms grow five feet long.

"There's a Christie Biscuit for every taste"

A Strange Case

High Temperature Apparently Normal For South Africa Man

A Natal man living in Harrismith claims to be the "hottest" man in South Africa. Five years ago it was discovered that he was "running a temperature." He was put to bed, the diagnosis being 'flu. He did not respond to treatment, and the next diagnosis was a chronic case of appendicitis. The appendix was removed, but the temperature remains, and his tonsils and a fistula operation followed in quick succession. Still the temperature remained. Then commenced a round of the leading heart, nerve, tropical disease and other specialists in Johannesburg, but the temperature remained. This was followed by a period in the Johannesburg General hospital, where other specialists examined him, and eventually he was handed over to the South African Institute for Medical Research, but there, too, all tests, blood counts, and so on, proved to be negative.

After five years the doctors have come to the conclusion that he is a freak, a man who walks around with a temperature which every day averages anything between 99.2 and 100 degrees—a temperature which would send any normal man to bed.

Definition Of Advertising

Mighty Force Which Will Keep Business On The Move

Advertising is a mighty force to which we become exposed the moment our father puts our birth notice in the newspapers, Harold M. Gulley, vice-president, Silverwood's Toronto Dairy Ltd., Toronto, told members of the Rotary Club at a recent noon-hour meeting. The average accountant may say it is a questionable expense since you cannot always trace results, and the experienced manager may say it is an absolute necessity, added Mr. Gulley, "but call it what you will, advertising keeps your stock-in-trade from having holidays; it brushes away cobwebs and dust, smartens shop windows, quickens the knowableness of salespeople and lets in the sunlight."—St. Thomas Times-Journal.

Theodore Roosevelt was the first President of the United States to fly in an airplane. He went up in a plane similar to the one the Wright brothers first flew.

One Solution Of Problem

How To Ease Your Conscience When Passing On Counterfeit Coin

From Le Sorelois, of Sorel, P.Q., comes the solution of a rather common problem in ethics and finance. While the solution is ingenious, it may be as well to state that neither Le Sorelois in publishing it nor The Printed Word in making a free translation, endorses the morality involved.

The problem is stated thus: "Someone gives you a counterfeit fifty-cent piece. What do you ordinarily do? You attempt to pass it on to another dupe. Don't deny it; on this point we are all alike. But the catch is that, nine times out of ten, you don't succeed. So, discouraged, you put the piece away in a drawer and decide to stay honest in spite of yourself."

Here is how the correspondent of Le Sorelois meets the situation. He says: "A customer buys from me an article worth 25 cents, giving me a dollar bill in payment. I must give him 75 cents in change. I put together my bad fifty-cent piece plus 35 cents in good money, making 85 cents in all, in place of 75. The customer, seeing that I have given him ten cents too much, hurriedly puts it all into his pocket, for fear that I shall see my error. My piece is gone, with a loss of ten cents, if you like, but at least I am rid of it. I do not have to reproach myself for cheating my customer, since he himself has been dishonest enough to cheat me. Thus I live in peace with my interests and my conscience."

Confidence Men Trapped

Man From Scotland Yard Posed As Foreign Tourist

A fake Tyrolean tourist has put the fear of the law into London's "sharepushers" who sell worthless stocks to visiting yokels.

Scotland Yard dressed its most German-looking detective in a good cartoon German costume, including Tyrolean hat and spectacles. It then sent him with a fist full of guide books to see the sights.

Confidence men, seeing a man who appeared to be a wealthy dolt as well as a foreigner who might have language trouble, made for him with keen expectations—only to be "conned" themselves and arrested.

Baseball originally was played with a flat bat.

Agriculture Owes Much To Men Who Are Looking For Solution Of Problems

Some fifty years ago a small group of men journeyed down from the Ontario Agricultural College, Guelph, to Toronto University. They were the graduating class at the College that year. The Faculty and Governors of Varsity had decided that having spent three years in study at Guelph and having won the approval of president and staff, these men might possibly be worthy of enrolment among the erudite and be granted university degrees.

They went in fear and trembling but were received with jubilation. Every man in Varsity had trained himself in barnyard calls and gave full voice to his new vocabulary as the fledglings lined up for the accolade; moos, baas, and grunts came from every quarter. The boys lived through it, went out into the world and made their marks as technical men and practical farmers. Since that eventful day in Canada's agricultural history the stream of trained agriculturists has flowed ever steadily out to make contact with the world. After a time graduating classes from seven other universities from the Atlantic to the Pacific added their quotas. Now about as many hundreds come out in the year as there were individuals in the early days.

For many years the practical side, some experimental work and teaching absorbed the flow. Gradually with ever more and better trained graduates and with Government recognition of the importance of agriculture and the problems confronting the farmer, research has come to the fore. To-day hundreds of highly trained specialists, many of them exceedingly capable and tremendously industrious, may be found here and there the Dominion over, from Prince Edward Island to British Columbia, ferreting out nature's secrets as they affect the farmer and resolving ever and anon problems once, and not long ago at that, thought to be quite beyond solution—How to grow wheat where wheat would not grow before; How to overcome rust and smut and wilt in cereal crops; How to control injurious and likewise beneficial bacteria; How to subdue the insect world; How to make many blades of grass grow where none or few grew before, and numberless other problems equally abstruse.

Some 18 years ago a group of pioneers in these various lines of work decided that some form of organization similar in character to the Royal Society of Canada and the American Association for the Advancement of Science but with its activities limited to the Agricultural field would be a good thing. To decide on the advisability of the movement was to act and the Canadian Society of Technical Agriculturists came into being.

Among its members may be found farmers, civil servants, college professors and all who may be interested in technical or even in purely practical agriculture. Members, once accepted as such, usually affiliate with one or more of the various groups into which the society naturally falls, as: Soils, Economics, Animal Production, Engineering, Horticulture, Etc.

Distances are great and salaries or incomes not commonly very large, hence attendance often involves real sacrifices. The annual meetings, however, are admittedly well worth while and invariably mean new ideas, new inspiration and renewed attacks on the many problems still resisting early efforts at solution.

The recent convention at Ottawa was in some sections particularly well attended and on every side was there evidence of well sustained enthusiasm and renewed determination to get to the bottom of problems as they confront the Canadian farmer. — Family Herald and Weekly Star.

Pay For Bumblebees

The market price for bumblebees now is five cents, a head. The buyer is Prof. John H. Gehrs of Southeast Missouri State Teachers College, who advertised for "lively and unharmed" bees. He wants to use them in a clover pollenization experiment.

Suppressing The News

In Many Cases Such Action Is A Great Mistake

The Canadian penitentiary authorities untook to transfer 130 long-term convicts from Kingston penitentiary to the western prisons at Stony Mountain and Prince Albert, Sask., and they naturally desired that the transfer should be accomplished with as little publicity as possible. They adopted the wrong tactics to achieve the result, however, says the Woodstock, Ont., Sentinel-Review. Instead of some of the higher officials giving out the news of the movement, there were denials everywhere, notwithstanding the fact that special railway coaches with barred windows were assembled at Kingston, and there were other unconcealed evidences of something out of the ordinary.

There are some people who never learn that the effective way to prevent misrepresentation in news is to give out a truthful statement. Nothing so disarms curiosity and suspicion. A frank statement of any case published in the newspapers disposes of most issues in the least embarrassing manner, if there happens to be controversial issues involved. A resort to suppression of news starts the tongue of all the gossips wagging and the state of secrecy which was intended is completely shattered by dangerous rumors and regrettable misstatement. Peculiarly, the worst offenders in this regard are to be found in government departments. In such quarters there seems to persist an ancient theory that the public is not sufficiently intelligent to entrust it with innocuous information.

Another Nascopie Wedding

Girl From Scot'and Is Second Bride On Ship This Year

A happy and excited bride-to-be, Miss Eileen Wallace, of Peterhead, Scotland, rode across northern Manitoba in a train en route to Churchill where she will board the Arctic supply boat Nascopie and be taken to Arctic Bay to meet her fiancé, Allan Scott.

Miss Wallace and Mr. Scott, her former Peterhead sweetheart, and now a Hudson's Bay Company post manager on Baffin Land, will be married aboard the Nascopie. Rt. Rev. Archibald Fleming, Anglican bishop of the Arctic, is expected to perform the ceremony, second wedding aboard the Nascopie this year.

The couple, whose home will be in the Arctic Circle about 1,650 miles north of Winnipeg, will be the only white persons at the lonely Arctic Bay outpost, apart from an occasional visit from a Royal Canadian Mounted Policeman, and the call of the supply boat once a year. Radio will be their means of communication with the world.

But Miss Wallace claims no bride could be happier than herself. "You can't scare me, I'll love it," she said. "Why my husband will be there. It is all perfectly thrilling, and I know I will love it."

Jade Found In B.C.

Piece Weighing 50 Pounds Presented To Provincial Museum

Jade, the precious rock only associated with the Far East, has been found in the pure state in the Lytton area of British Columbia. A huge chunk of it, weighing 50 pounds, two feet long and a foot thick, has been presented to the Provincial Museum by Assistant Commissioner T. W. S. Parsons, of the Provincial Police, who is a collector of curios. It is the first time jade has been discovered on the North American continent in its natural state as it comes away from the rock.

The monsoon, the wind which brings rain to India, arrived this year two weeks earlier than usual. Owing to the monsoon, the flying boats of the Empire Airway have changed one of their refuelling bases from Gwadar to Jinnri, which is more sheltered.

May Acquire Small Fortune

Prospector Finds Sand On Natal's Beaches Contains Ilmenite

Beaches at Natal, South Africa, may shortly provide a prospector with world-wide experience with a small fortune.

For years past holiday-makers have basked in the sun and allowed the warm sand to trickle through their fingers—grains of sand which left small, black deposits behind. In doing so they have literally let a small fortune slip through their hands.

Investigations have proved the black particles to be ilmenite, the metallic substance which is a basis of the world's best white paints.

The main source of the world's supply of this heavy substance, which is valued to-day at between \$10 and \$15 a ton, is a little-frequented beach on the Indian coast, and it is collected by the most primitive methods and shipped in thousands of tons to North America, where it is treated and turned into white paint.

The prospector, who is now a resident of Natal, has arrived at a decision that the deposits on the Natal coast are payable. Samples have been collected and sent to Pretoria and London for assay, as it is known that there is a small amount of tin included in the deposits on the beaches.

A company is now being formed to deal with the deposits which can be found along the north and south coasts. Endeavors will probably be made to trace the source of the ilmenite in the Natal hinterland.

Opinion Of Expert

Spider Bites Momentarily Painful But Are Never Fatal

Spiders even the notorious Black Widow are not dangerous. In fact they serve a useful purpose and should not be killed.

This is the opinion of Takatsuma B. Kurata, a Japanese, of the Royal Ontario Museum of Zoology. Mr. Kurata is the only man in Canada who devotes his entire efforts to studying these creatures. He has been interested in spiders for 25 years and has been bitten many times by all types, including Black Widows, tarantulas, banana spiders, and scorpions. Never has he suffered any ill effects from these bites apart from a momentary pain from the bite.

Interviewed in the lamp-lit tent that serves as headquarters for the zoology expedition investigating spiders and grasshoppers at the National Park, in Point Pelee, Ont., Mr. Kurata scoffed at the general fear of spiders.

"I've never been sick from a bite. No, I think the fear makes the sickness. Chances are the spider crawls on a person's body; they feel a prick and then they pick it with a dirty finger nail and infect it," he said.

Pilot balloons, which are similar to toy balloons and which are used for meteorological observations, have been known to ascend to a height of 17.1 miles into the stratosphere.

During the 1936 season, 70,000 tons of South African fruit reached the port of London.

Scientists Helping To Combat Dread Disease Prevalent Among Horses

Horses In New York

Only Number About 10,000 But Are Well Cared For

New York City's horse population has decreased by 240,000 in 40 years, according to the American Society for the Prevention of Cruelty to Animals. Since there are still more than 10,000 horses in the city, however, the society does not anticipate early extinction of its horse-watering activity, now reaching a hot-weather peak.

"While horse-drawn vehicles are gradually lessening in number, New York will always have a certain amount of freightage by them, especially for short hauls," said Sydney H. Coleman, executive vice-president.

The forty or more permanent drinking fountains for horses in the city were increased to more than 100 for the summer, the society reports. The temporary stations are situated at points where horse traffic is heaviest—at the docks and the public markets. An A.S.P.C.A. tank car makes the rounds, supplying not only water for the horses but ice water for the drivers. In addition, two horse ambulances maintain 24-hour service to aid horses suffering from heat prostration.

This phase of the society's activity is now in its 72nd year. It was inaugurated by Henry Bergh, founder of the A.S.P.C.A., in 1866. The horse-watering stations are maintained by donations to a fund set aside for that purpose. Special efforts are made to keep the water pure, since horses will not drink polluted water.

Medical Discovery

Air-Conditioning Of Hospitals Eliminates Danger From Pneumonia

A discovery that air-conditioning apparently eliminated 99 per cent. of post-operative pneumonia was reported at Corey Hill hospital, Boston. Rigid control of humidity, keeping it low, at 30, compared with the 90 humidities which have been "scorching" the eastern United States this summer, appeared to be fully half the cause of improved vigor.

The lung trouble is one of the risks of surgical operations, for which no satisfactory preventive heretofore has been found. It happens after six to seven per cent. of operations, according to a survey made by the Massachusetts General hospital.

But at Corey Hill, with air-conditioning, 743 operations in a year resulted in only one case of post-operative pneumonia. Recovery in this case was quick.

Now that thousands of people are daily travelling by plane, it's a wonder somebody hasn't found a way to stick a billboard on a cloud.

Transparent resin, one-third the weight of glass, and unsplinterable, is being made from coal in England.

Strange Beliefs

Weird Remedies Used By People Of Eastern Countries

There are beliefs among the Burmans, the Chinese, Siamese and Malays regarding the beneficial effects of drinking the blood of animals and birds. The Chinese prefer duck's blood as a cure for certain ailments pertaining to the chest and stomach. The Malays and Siamese seek the tiger's blood as an antidote to failing health. Some people in Burma take the blood of monkeys to cure diseases of the heart. Tiger's flesh is sought after by the Chinese, Malays and Siamese, who believe that it tends to give vitality. Malay and Siamese athletes, especially footballers and boxers, are credited with consuming the blood and flesh of tigers to give them endurance and courage. Tigers are more easily got in Malaya and Siam than in Burma. The drinking of pigeon's blood in the belief that will cure chest complaints is a practice in Rangoon even among people of some education.—Indian Press Union.

A Narrow Escape

Man Carried Out By Tide Into The English Channel Is Rescued

After the harrowing experience of being carried in an open rowboat by the tide into the English channel and buffeted by a choppy sea for hours, Eric Wainwright, of Montreal, was rescued.

Wainwright decided to escape the heat by rowing out into the channel breeze. When he was seen being swept out to sea by the tide, a search was launched by three men in a rowboat, an air force plane, and the Hythe lifeboat, without success.

Wainwright explained what happened. "I had become exhausted when I saw a cargo vessel and hailed it," he said. "The crew picked me up and hauled the rowboat aboard. I saw the airplane but had no idea it was searching for me."

Pussy willows do not need bright colors in order to attract bees. They appear so early in the spring they have no competition from other flowers.

Value of farm poultry in Saskatchewan last year is estimated by the Dominion bureau of statistics at \$4,544,000.

J. E. Gooder - Editor & Manager

The World of Wheat

By H. G. L. STRANGE

Director "Crop Testing Plan"

Alberta farmers in certain large areas need badly a new variety of wheat that will be as early as Garnet and that will possess the high qualities of Marquis.

The University of Alberta, the Dominion Experimental Farms at Lacombe, Lethbridge and Beaver Lodge, and the provincial Schools of Agriculture at Olds and Vermilion are working steadily on this problem, but they now need the farmers' help, for the much desired new variety will be produced quicker if the plant breeders in these institutions can find out what farmers think of the varieties they are now using.

The University of Alberta recently published bulletin number 30, which deals with cereal crops. I recommend every farmer to write for a free copy of this excellent bulletin and then to fill in and to mail the questionnaire on wheat that will be found therein.

Those who have received the bulletin, but who have not yet filled in the questionnaire, should, I courteously suggest, do so, for the information that farmers can supply. I am assured by Dr. Neatby of the University of Alberta, will most definitely help our plant breeders to produce the high quality earlier variety of wheat now so badly needed.

Following factors have tended to raise price: Russia withdraws wheat offers -- European news still unfavorable -- Germany makes substantial purchases of Argentine corn, Canadian and Rumanian wheat -- Italian wheat import requirements believed large and corn moderate -- United Kingdom taking good quantities of Australian wheat -- Adverse weather delays Russian harvest.

Following factors have tended to lower price: New Argentine wheat offerings below present prices -- Switzerland increases wheat import duty -- Australian wheat crop improves -- High Balkan minimum wheat prices restricts sales to countries with available currencies -- Argentine wheat reserves may be larger than believed -- Rumanian wheat crop probably 24 million above 1937.

Scout and Cub Corner.

Scouts will muster 7:30 p.m. tonight at the depot platform. If wet meeting will take place at the Legion Hall.

Don Dunlop and Jack Edwards made their overnight hiking test on Sunday and Monday. They went as far as the Little Red and spent the night on W. Davies' place.

Municipal District of Mountain View No. 310.

NOTICE.

Public notice is hereby given that there has been introduced in the Council of the Municipal District of Mountain View No. 310, a By-Law to authorize an Agreement with the Town of Didsbury, as follows:

By-Law No. 88

A By-Law of the Municipal District of Mountain View No. 310 to authorize and empower the Reeve and Secretary-Treasurer to execute a certain Agreement made between the Town of Didsbury and the Municipal District of Mountain View Number 310 and the Municipal District of Westerdale Number 311.

WHEREAS an agreement has been negotiated between Town of Didsbury and the Municipal District of Mountain View Number 310, and the Municipal District of Westerdale Number 311, for the provision of Hospital facilities in the said Town of Didsbury, to be known as "THE DIDSBURY AND DISTRICT GENERAL HOSPITAL,"

AND WHEREAS an Act entitled "The Didsbury and District General Hospital Act", has been passed by the Legislature of the Province of Alberta, at its first session of 1938, empowering, subject to the provisions of the said Act, the said Town and the said Municipal Districts to enter into such an Agreement,

NOW THEREFORE the Council of the Municipal District of Mountain View, Number 310, in open Council assembled enacts as follows:-

THAT the Reeve and Secretary-Treasurer of the Municipal District of Mountain View, Number 310, be and they are hereby authorized to execute on behalf of the said Municipal District of Mountain View, Number 310, a certain Agreement, which is hereto attached, and forms part of this By-Law.

Read a first time this 7th day of May A.D. 1938.

Read a second time this 7th day of May A.D. 1938.

Read a third time and finally passed this day of A.D. 1938.

Reeve

Secretary-Treasurer.

THIS AGREEMENT made this day of A.D. 1938

BETWEEN:
THE TOWN OF DIDSBURY (hereinafter referred to as the Town),

of the ONE Part;

and
THE MUNICIPAL DISTRICT OF MOUNTAIN VIEW, NO. 310, and MUNICIPAL DISTRICT OF WESTERDALE, No. 311, (hereinafter referred to as the Municipal Districts)

of the OTHER Part.

WHEREAS there is in existence in the Town of Didsbury a Hospital known as the Didsbury General Hospital operating jointly under an agreement between the Town and Municipal Districts;

AND WHEREAS the Municipal Districts jointly own the site and buildings in which the said hospital is operated;

AND WHEREAS the Town and Municipal Districts jointly own the equipment, supplies and other assets contained in, on or about the said hospital buildings;

AND WHEREAS the Municipal Districts have agreed that they will transfer all their hospital land and buildings, and the Town and Municipal Districts have agreed that they will transfer all the said equipment, supplies and other assets to a Board consisting of representatives of the Council of the said Town of Didsbury and representatives of the Councils of the said Municipal Districts of Mountain View and Westerdale upon the condition that the said Board to be appointed as aforesaid will erect a community hospital within the Town of Didsbury;

AND WHEREAS the parties hereto, being desirous of taking joint action for the purpose of providing for their respective needs for hospital facilities, have agreed as follows:

NOW THIS AGREEMENT WITNESSETH that the Town and the Municipal Districts do each agree with the other, as follows:

1. The Town will provide the Board hereinafter constituted with the money requisite to erect, complete and equip a hospital according to plans and specifications to be approved by the Town and the Municipal Districts which money is estimated to be the sum of \$30,000.00, or thereabouts.

2. The Town will provide at its own expense sidewalk approach to the corner of the site on which the hospital is built, and any necessary street lights.

3. The Town will proceed to issue debentures for the sum of \$30,000.00 bearing interest at not more than six per cent per annum, repayable in fifteen equal aggregate annual instalments of principal and interest amounting to \$3,088.86 for the purpose of providing the necessary fund for the erection, completion and equipment of the said hospital.

4. Upon the Town selling the said debenture issue of \$30,000.00 or obtaining the said sum by any other means, the Municipal Districts shall each contribute towards the cost of the erection, completion, and equipment of the said hospital, the sum of \$10,000.00 and interest payable by each Municipal District in fifteen equal annual instalments of blended principal and interest amounting in each case to \$1,029.62, provided, however, that such interest shall be at the same rate as is actually paid by the Town in respect to the aforesaid sum borrowed by the Town, the first of such instalments to be paid at the expiration of one year from the date of the bonds, debentures or other security given by the Town as security for the said loan and thereafter on the same day in each succeeding year until the sum of \$20,000.00 with interest as aforesaid is fully paid.

5. The duty of acquiring a site, erecting, completing and equipping the hospital and its subsequent operations shall be upon the Hospital Board consisting of six (6) members. Two members shall be appointed by each of the Councils of the Town of Didsbury and the Municipal Districts of Mountain View and Westerdale by a resolution of the Councils thereof respectively.

6. As soon as conveniently may be after the Town has sold or otherwise disposed of the said debenture issue of \$30,000.00 the Town and the Municipal Districts will proceed to appoint the members of the said Board.

7. The members of the Board so appointed shall hold office until their successors are appointed, or in the event of death or resignation of any member of the board, his successor shall be appointed in the same manner as his predecessor was appointed.

8. In the month of March in each year following the year in which the Board is constituted, the Council of the Town and the Councils of the Municipal Districts shall each appoint the members of the Board as hereinbefore provided:

9. The powers of the Board shall be as follows:

a) To apply all moneys furnished by the Town and the Municipal Districts, or any of them for the purpose of acquiring a site, erecting, completing and equipping the said hospital or any additions, alterations or extensions thereto in accordance with the said plans and specifications and any directions which may be given jointly by the Councils of the Town and the Municipal Districts.

b) To manage and control the affairs and business of the hospital;

c) To engage any necessary officials and servants, and to prescribe their remunerations and duties and to terminate any such engagements;

d) To apply all moneys received by the Board on account of the operation of the hospital for the purposes of the hospital;

e) To keep proper books of accounts.

f) To require that any member of the Board and any employee of the Board who has the handling of any

moneys entrusted to or received by the Board shall furnish a bond of a company licensed to conduct the business of bonding in the Province in a sum not less than \$5,000.00;

g) To submit all books of accounts, vouchers, statements and documents relating to the affairs and business of the hospital to the inspection of any auditor or auditors appointed at any time or times by the Town and the Municipal Districts jointly or by any of them;

h) To submit statements as to the financial transactions of the Board and current receipts, disbursements, assets and liabilities to the Town and Municipal Districts annually in the month of March in each year and whenever required so to do by the Town and Municipal Districts or any of them.

10. The resident sick of the Town and the Municipal Districts respectively shall have the right to admission to and treatment in the hospital in priority to any other persons.

11. The amount of the hospital charges shall be such as may be from time to time fixed by the Board and approved by the Town and the Municipal Districts respectively.

12. The Hospital Board shall be known as "The Didsbury and District General Hospital Board" and the hospital shall be known as "The Didsbury and District General Hospital."

13. The Town and the Municipal Districts shall each be responsible for the payment to the Board of all hospital charges payable in respect of their respective residents which are not paid by such residents.

14. The deficits incurred by the Board in the operation of the hospital shall be annually apportioned between and paid by the parties hereto as follows: So much of the deficit as is attributable to the hospitalization of persons who are not residents of the Town or of the Municipal Districts on the basis of one-third thereof to the Town and two-thirds thereof to the Municipal Districts, and the remainder of the deficit shall be apportioned between the Town and the Municipal Districts in the proportion which the total number of hospital days of patients who are residents of the Town during the year bears to the total number of hospital days of patients who are residents of the Municipal Districts respectively.

15. All future capital expenditures incurred in connection with the said hospital and all unforeseen losses or expenditures incurred in connection therewith shall be apportioned between the Town and each of the Municipal Districts on a one-third share basis.

16. This agreement shall continue in full force and effect so long as any sum payable by the Municipal Districts pursuant to this agreement, or any sum which the Municipal Districts become liable to pay on account of any capital expenditure in respect to the hospital, remains owing and unpaid; and upon all such indebtedness of the Municipal Districts being paid and satisfied, either party may terminate this agreement by delivering to the other twelve months' notice in writing of its intention to terminate the said agreement, and upon the expiration of such notice, this agreement shall cease.

and the affairs of the hospital shall be wound up and the surplus, if any, shall belong to the Town and Municipal Districts in the proportions of one-third to the Town and one-third to each of the Municipal Districts. In the interval between the time the full amount owing by the Municipal Districts as aforesaid has been paid and the termination of this agreement as herein provided the Town shall be deemed to be the owner of an undivided one-third interest in the property vested in the Board by this agreement and the Municipal Districts shall each be deemed to be the owner of an undivided one-third interest in the said property.

17. This agreement is upon the express condition that if upon the first day of June, A.D. 1941, the Town shall have failed to sell the said debenture issue of \$30,000.00, or to obtain the said sum of \$30,000.00 by any other means and to pay the proceeds thereof to the Board as hereinbefore provided, this agreement shall thereupon become void and of no effect.

IN WITNESS WHEREOF the parties hereto have caused their corporate seals to be hereunto affixed in the presence of and attested by its proper officers, the day and year first above written.

and that a copy of the same may be seen in each of the following places:- at the Post offices of Netook, Olds, and Didsbury, The Municipal District office, Didsbury, and at the residences of each of the councillors of the Municipal District of Mountain View No. 310; Messrs. P. Saunders, W. D. Archer, J. W. Rupp, J. A. Dodd, B. C. Trimble and W. A. Kuehn, and at the following School Houses, Betchton, Coburn, Samis, Hammer, Poplar Creek, Huntcliff, Reed Ranch and Gore and at the following community halls, Lone Pine, Mt. View, and Mayton.

and further, that unless within thirty days from the publication of this notice, at least fifteen per cent, of the proprietary electors of the said Municipal District petition the Council to submit such By-Law to the vote of the proprietary electors of the said Municipal District, the Council will proceed to pass the same.

Dated this 31st day of August, 1938.

Alfred Brusso,

Secretary-Treasurer.

Municipal District of Mountain View No. 310.

Westcott Notes

The Westcott W.I. met with Mrs. Macfarlane on Thursday last. The afternoon was spent in giving a report of the Farm Women's Week at Olds. Illustrated booklets on Canada's National Parks were distributed among those present. The next meeting, at Mrs. Martin Jacobsen's home, will be an important one. It is hoped that all members will be present to make the necessary arrangements for the annual bazaar. The wool contest is to be held at that meeting and the articles will be donated to the bazaar.

Items of Interest

R C M.P. officers have discovered five patches of marijuana weed growing in the Turner Valley area. Three were found in the oil fields and two in Okotoks.

Five hundred pounds of the plant have been confiscated and burned, but it is believed that there is a great deal more growing in the district. As far as is known none has been used for drug extraction and none of the plants were in bloom. The plots were being used as windbreaks for gardens, and the owners of the gardens did not know that the plant was the prohibited weed.

Entries owned by W. A. Crawford, Frost of Nanton, Alta., made a clean sweep in the Hereford cattle judging at the Central Canadian Exhibition, winning both championships and reserves for bulls and females.

The first cutting of alfalfa in Canada in 1938 yielded 1,427,000 tons from 832,200 acres, compared with 1,572,000 tons in 1937 from 848,900 acres, or a yield of 1.71 tons per acre in 1938 and 1.85 tons per acre in 1937.

Ellis A. Johnstone, former manager of the Palm Dairies, at Calgary, has taken over his new duties as manager of the Central Alberta Dairy Pool. Mr. Johnstone has over 20 years of experience in the dairy and co-operative field in Western Canada from Regina to Vancouver. He takes over management of the Dairy Pool in succession to William Adrain, former Pool manager, and will make his headquarters in Red Deer.

The Canada Year Book

The publication of the 1938 edition of the Canada Year Book published by authorization of the Hon. W. D. Euler, Minister of Trade and Commerce, is announced by the Dominion Bureau of Statistics. The Canada Year Book is the official statistical annual of the country and contains a thoroughly up-to-date account of the natural resources of the Dominion and their development, the history of the country, its institutions, its demography, the different branches of production, trade, transportation, finance, education, etc. — in brief, a comprehensive study within the limits of a single volume of the social and economic condition of the Dominion. The new edition has been thoroughly revised throughout and includes in all its chapters the latest information available up to the date of going to press.

The 1938 Canada Year Book extends to almost 1,200 pages, dealing with all phases of the national life and more especially with those susceptible of the statistical measurement. A statistical summary of the progress of Canada is included in introductory matter. This gives a picture in figures of the remarkable progress which the country has made since the first census of the Dominion was taken in 1871, sixty-seven years ago.

There are over 30 maps and charts contained in the volume, and two photo gelatine inserts illustrating the sections on "The Flora of Canada" and "Historic Sites and Monuments," respectively. Three lithograph maps are included.

Persons requiring the Year Book may obtain it from the King's Printer, Ottawa, as long as the supply lasts, at the price of \$1.50, which covers merely the cost of printing, paper and binding. By a special concession, a limited number of paper-bound copies have been set aside for ministers of religion, bona fide students and school teachers, who may obtain copies at the nominal price of 50c each.

Finds Eight Leaf Clover

Billy Bloss of Eagle Hill recently found an eight leaf clover in that district. In referring the matter to the Family Herald and Weekly Star, who run a department for classification of such rare plants, it was found that in all their history they had never received an official record of another like it. So we would advise Billy to hang onto that clover as a double symbol of good fortune.

WORLD HAPPENINGS BRIEFLY TOLD

At Port Arthur, Hon. C. D. Howe, minister of transport, was made Chief "Nee-Ga-Nee-Ga-Ba"—chief of the land and the air—by a group of Indians staging a street carnival.

The Helsingfors stadium will be enlarged to accommodate 60,000 spectators for the 1940 Olympic games, it was decided by Finnish Olympic authorities.

Calgary now owns land for a new \$250,000 airport. Payment of \$31,726 for the property, 640 acres of farm land just outside the north city limits, has been made, civic authorities announced.

Blind and deaf since birth, Winthrop Chapman, 23, has sailed for South Africa as an apostle of a system of lip-reading by touch. He is a son of a Redfield, South Dakota, doctor.

The small red boxes which the Bournemouth corporation placed in all their buses last year to receive fares which conductors omitted to collect yielded almost \$940 when they were opened.

Premier Edouard Daladier, in a press interview, declared there was no cause for concern in the present financial situation and set at rest rumors that French finances were in a critical state.

Of the 45 countries supplying honey to the British market in 1937, Canada again held first place, with slightly more than 22 per cent. of the total imports which amounted to 89,722 cwt. Of this amount Canada supplied 19,984 cwt.

An 11-ton white marble Buddha, gift of China to Great Britain, has created a housing problem in the British Museum which officials say will not be solved for months by finding a suitable position. It dates from 585 A.D.

The French ministry of posts has issued a special foreign postage stamp in honoring the 300th anniversary of Dom Pierre Perignon, the Benedictine monk who invented and developed the process of making champagne.

His Scheme Worked

Man Used New Idea To Get Roast For Nothing

A new stunt for securing a roast has been discovered in Norwich, Ont. Recently T. Wright & Son, from near Aylmer, opened a butcher shop in town. Towards the week-end an apparent customer walked into the shop and explained that he had just returned from a trip to California and was consequently short of cash, but that he had several five-pound pails of honey in the car which he would be glad to trade for equal value in meat. For the honey he wanted 10c a pound. Mr. Wright agreed that a trade could be made and cut off a nice piece of meat which, when weighed, came to \$1. The new found friend would just take it to the car and return immediately with two pails of honey. He failed to return.

New Wheat Class

Will Appear On Prize Lists Of Chicago Grain Show

A new class for wheat will be placed on the prize lists of the Chicago International Hay and Grain Show this year, Dr. John H. Parker of Manhattan, Kas., director of the Crop Improvement Association of America, told the annual meeting of the Canadian Seed Growers' Association, Alberta branch at Lacombe.

Milling and baking qualities of the wheat will become major points in judging wheat in the class, Dr. Parker said, while the other standards, hardness, moisture content, and maturity will also receive consideration.

Letter Boxes On Buses

The experiment of fixing letter boxes on buses plying on one route in Bombay having proved a success, boxes are to be provided on a second route. It has been found that letters posted in these boxes reach the G.P.O. quicker and a later hour of posting is afforded. The letters are cleared at a stop near the G.P.O.

During the first eight months of last year, 3,184,000 foreign automobiles entered the Dominion of Canada.

Plans Being Made

For Canadian Representation At Seventh World Poultry Congress

Indications are that Canada will be well represented at the forthcoming Seventh World Poultry Congress with a number of provincial or sectional exhibits and commercial and live bird exhibits. The congress will meet at Cleveland, Ohio, from July 27 to August 7, 1939. The members of Canadian executive of the Congress in their meeting at the Central Experimental Farm, Ottawa, have been busy arranging pre-congress tours for European delegates, Canadian tours to the Congress, and matters pertaining to the exhibits and other details.

Canada has been represented at all the previous World Poultry Congresses except the first one which was held at the Hague, Holland, in 1921. The second Congress assembled at Barcelona, Spain, in 1924; the third in Ottawa, 1927; the fourth in London, England, 1930; the fifth in Rome, Italy, 1933, and the sixth at Leipzig, Germany, 1936.

Task For The Courts

Belgian Woman's Will Necessitated Going Back Over 300 Years

Bequeathing her money to relatives to the twelfth generation, a Belgian woman has given the courts in Termonde, Belgium, a task of dividing millions of francs among more than 4,000 people. A professional genealogist has made a family tree 450 feet long and going back to 1600. Among the heirs are a cabinet minister and two professors.

SLIM FLATTERY EASILY MADE
By Anne Adams

SO RIGHT for every matron—whether or not she has to reckon with over-emphasized curves! And Pattern 4863 is a perfect example of the new trend in shirtwaist dresses. This season's tailored frocks have a softer, "dressmaker" effect, shown in this design with its smartly slenderizing yokes, neat little puffed sleeves and soft gathers at centre front and waist. Don't you like that neat skirt with a centre seam and single inverted pleat? Saucy buttons and pockets add charm too! This frock is so easy and inexpensive to make up—that you're almost sure to want several in a variety of fabrics. Consider checked cottons and washable synthetics... for now, and autumn too! Sewing Instructor included.

Pattern 4863 is available in women's sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 takes 3 3/4 yards 36 inch fabric.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

JIM HOGAN, JASPER, ALTA., WINS JUNIOR GOLF CROWN

Young Canadians have now a stronger incentive to take their golf seriously for the handsome Buckingham Cup donated by Charles H. Schlater of Hamilton to the Royal Canadian Golf Association is one any lad would be proud to hold. The first winner is shown above receiving the trophy from Mr. Schlater. He is 19-year-old Jim Hogan, sharpshooter from Jasper, Alta., who carded 157 over the London Hunt and Golf Club course to lift the Canadian Junior crown this year.

Hobby Is A Pleasure

Florida Bachelor Throws Home Open To Many Guests

Joseph F. Miyares, lawyer and self-styled "old bachelor", of Tampa, Fla., has been host to more than 200,000 guests during the last 10 years at his home, Villa del Rio, and most of his visitors have been children of high school age.

The Tampa attorney said "it's simply a hobby and the pleasure is all mine," as he explained that reputable organizations, high school fraternities and class parties were welcome to use his home at any time for "good, clean, wholesome fun."

An average of 300 guests a week during the past 10 years have taken advantage of Miyares' "hobby", danced at his home, used his 50-foot swimming pool and roamed the two acres of gardens which surround his home.

The parties given at his home always are well chaperoned, Miyares said, "but on some counts they must do as I say."

Railroads Of Tomorrow

Will Have Freight Trains Travelling Faster Than To-Day's Express

According to Pullman Advertisement the tomorrow of railroading will open up a new world. For not only will high speed, high-powered, bullet-nosed, streamlined trains be cutting through time on every line, but the merchandise of the world will also be carried at a speed far greater than the ordinary passenger train is travelling to-day. For your freight trains, too, will be light weight, modern carriers, travelling with the speed of the wind.

Ohio's first electrocution for a capital crime took place in 1897.

Some Errors Of Speech

Ludicrous Meaning Is Often Conveyed States College Professor

"The dangling participle is one of the most deadly pitfalls in the English language," in the opinion of Professor Walter E. Prince, of the English department at Massachusetts State College, Amherst. "The worst error in English grammar which I find among my students", Professor Prince said recently, "is the use of dangling modifiers, chiefly dangling participles." As an example of the ludicrous meaning conveyed by use of a dangling participle Professor Prince mentioned the sentence, "Having eaten our lunch, the boat departed."

The State College professor also mentioned as examples of faulty grammar and diction often found among college students the usages of "due to" instead of "because of," "different than" instead of "different from," "had ought" instead of "should", and the usage of plural as in "everyone kept their seats" instead of "everyone kept his seat". —Charlottetown Guardian.

Taking It Easy

A motorist drove to the centre of the mile-long Chemong floating bridge near Peterborough, Ont., recently, parked his car and fished without getting from his seat. He caught a bass, dragged it in and drove away.

Stockholm Has Good Idea

Locomotives running out of Stockholm, Sweden, will announce their approach to level crossings through radio loud speakers. The speed of each train also will be indicated.

Britain now has 1,400,000 domestic servants.

This new International Harvester combine—specially built for six-foot swath and to be towed by tractor was demonstrated at the factory in Hamilton, Ontario, the last week of July. A field of wheat was cut and threshed, flour made and bread and buns baked for a banquet the same day. We are told this size combine is especially valuable on 160-acre farms.

Health LEAGUE of CANADA
presents

Building Up The Navy

Thousands Of Workmen Busy In Great Britain's Shipyards

Thousands of workmen in Great Britain's shipbuilding yards are engaged in the biggest naval construction program in world history.

The Admiralty is building or has ordered 118 ships, ranging from mighty battleships to tiny torpedo boats, submarines and mine sweepers. In addition, 21 other ships are projected for this year, enough to increase the tonnage of the British Navy by one-third.

Every rivet driven into a hull, every gun mounted, represents another step forward in Britain's rearmament program, designed to make the country invincible to attack and restore the navy to a paramount position on the seven seas.

The list of vessels already on the dockyard stocks or on order, would make a formidable fleet in themselves; five battleships, five aircraft carriers, 17 cruisers, 40 destroyers of different sizes, 18 submarines, five escort vessels, seven mine sweepers, four patrol ships, two surveying ships, two depot ships, three river gunboats and many small craft—550,000 tons of sea strength.

The 1939 program, which hasn't reached the ship-building yards, is as follows: Two battleships, seven cruisers, one aircraft carrier, three submarines, three minelayers, two river gunboats, two depot ships, one repair ship and many small craft such as tugs, torpedo boats and boom defence vessels.

Still Looking For Ruler

Five Signs By Which Tibetans Will Know Dalai Lama

Lieut. P. Burder of the Leicestershire regiment stationed in India has returned to Darjeeling after a history-making hike into Tibet and back. He took a month to complete the journey of 500 miles and his boots were worn out when he arrived back.

Everywhere in Tibet Lieutenant Burder found the friendliest welcome, and a country-wide concern for the new Dalai or Tashi Lama. They eagerly await the signs of Dalai Lama's reincarnation. There are five signs, they told him. Folds of flesh on the shoulders (being vestiges of a second pair of arms); large ears; marks as of a conch shell on the hands; tiger marks (stripes) on legs; and eyes with brows that are long and curl upward. The last Dalai Lama had the first three signs. It is not apparently necessary that all five signs should be present.

His Funny Story

The elevator was not working, so the three men had to walk upstairs to the 50th floor. One of them suggested that they should tell funny stories so they would not notice the distance.

They had reached the 35th floor when it was the third man's turn.

"The story I have to tell will break your heart," he said.

"Never mind about that, tell us," said the others.

They went on arguing, until at last he told them:

"I have left the key downstairs."

It is said that sleep-walking is more common in Sydney, Australia, than in any other city of the world.

It would take 40 days and nights to hatch an ostrich egg by artificial incubation.

POOR MAN'S GOLD

COURTNEY RYLEY COOPER

COPYRIGHT-COURTNEY RYLEY COOPER • • • W.N.U. SERVICE

CHAPTER II.—Continued

The day passed; jammed in the crowds at the various hardware stores, Jack bought gold pans, picks, hammer, saw and nails, and a dozen other forms of supplies. Night was broken by the barking of soft-muscled Prince Rupert dogs, being led to the station—many of them to their ultimate slaughter. Trucks whined up and down the abrupt hill; slow-moving horses and trucking drays furnished an obbligato to the rumble of motors. A new community, in its every phase, good, bad, upright, low, was forming for life in a far-away, unknown land. He and Joe had created it; now Jack Hammond, as he tried to sleep, felt for the first time a true responsibility for it. Perhaps that was why Around the World Annie snapped her greeting so crustily the next morning.

"Well, Prospector; sore because you ain't got the whole North to yourself?"

Jack halted in his progress through the jammed waiting room of the railroad station. The tri-weekly train was just backing in from the coach yards, with extra chair and baggage cars. Hammond waved to the woman, and with a laugh, edged toward her. It was not an easy journey; his pack sack, topped by an elderdown sleeping bag, bumped and swayed awkwardly with contact against the milling throng. Every one carried pack sacks, one arm carelessly under a shoulder strap; even Around the World Annie had one.

"What was that remark?" Hammond joked, when he reached her.

"What's been eatin' you?" asked Annie. "You look like somebody's stepped on your chin."

The man spread his shoulders.

"Just thinking," he said. Again he looked out over the mob; people crammed in tight groups, or milling excitedly, or merely sitting, like so many homeless souls, on piles of duffel. "Look at 'em—all of 'em going to make a million."

"Well, if they think so, what's the difference?" asked Annie. "They'll be happy until they find out it ain't so."

Late that afternoon, Jack Hammond got tired of being jammed against the knob of a vestibule door. The cars had become cold now; pipes clanked only faintly with the application of steam. The train was high on the pass over the Coastal range; snow had appeared, at first only a wet sprinkling on the rain-glazed side hills, gradually to become more stable. Now the world was one of filigreed silver; spruce and pine and Douglas fir all shielded with filmy white.

He moved forward through the train, taking exercise in merely forcing his way through the crowds which jammed the aisles. At last he tired and prepared to turn back, only halting to see that Around the World Annie sat in a seat toward the front of the car, her head bobbing energetically as she talked to someone beside her. It was a young woman—Jack noticed little more. Finally Around the World Annie straightened, rose and moved away. Someone else dropped quickly into the seat. Hammond moved into the next coach, found a resting place and stayed there.

Night came, with frost-caked win-

dows and the whine of wind. Snow was now heaped deep beside the right of way. The massed humanity of the train became more and more dormant, suddenly to sweep from its torpidity into excited activity.

They were at Fourcross.

From outside came almost carnival-like sounds. Dogs barked. Children shouted. A raucous voice reared itself above the other noises:

"A-right, folks. Get a good night's sleep. Warm bed and a hot tent for the night, one dollar."

"Where are those beds?" asked Hammond, as he dropped from the train.

"Right over there—" the speller pointed to a line of men moving from the baggage car toward the dull, kerosene glow of a row of tents which spotted the darkness some hundred yards away through the snow. "Right over there, Pardner! Have 'em set up in no time. Good warm bed, folks. Only a dollar!"

"Save me one," Hammond commanded and turned to raise his pack sack. He halted, hand extended. In the tangle of activity, he saw Around the World Annie gesticulating with some fervor as she again talked to her companion of the afternoon. She was not recognizable in the shadows; nevertheless, there was something about her which held the man's attention. She stood at one side, ankle deep in snow, her coat pulled tight about her slight form—lack of bulk in her clothing made her seem almost frail beside the thickly clothed, wool-swathed persons about her. Annie waved a hand.

"Hey," she called to one of her newly outfitted brood. "Bring me that pack sack!"

The girl lifted her pack sack and with lolling steps, came forward. Around the World Annie bent resolutely, failed, loosened her waist with a pawing motion of her hands, tried again and made it. She jerked loose the straps.

"Here," she said. "Take these woolies. And this shirt."

The girl bent with outstretched, eager arms to receive them. Her face came into the meager spread of light from the train windows. Jack Hammond started. He knew her now—the stairway leading to his attorney's office, this girl coming unsteadily downward, her hand clutched at her throat, her brown eyes staring—

"Thank you," said the girl in a muffled voice. She started to move away. Around the World Annie whacked her on the back.

"And don't be a sap!" she cautioned.

"Thank you," came again.

Hammond watched her as she went on, huddled over the burden of good fortune which she held tight to her.

"Who's that girl?" he asked as Annie, somewhat belligerent that he had sighted her generosity, swept past him. The woman turned.

"Darned if I know," she answered. Then dismissing him, she turned. "Come on," she called to her waiting brood. "Let's find out where the Ritz hotel is at around this dump."

CHAPTER III.

Jack Hammond did not see the girl again for nearly a week. That was not unusual. Fourcross rapidly had become a madhouse of endeavor—and of waiting. McKenzie Joe was the only person who had gone onward, after leaving a note for Hammond, saying that he had changed his mind and stocked up with a four months' supply of food. Then Sergeant Hubert Terry of the Royal Canadian Mounted Police had arrived, holding everyone until a large group could follow Hammond's lead into the Stikine.

"After all," he had said. "You

Wrigley's Gum helps you keep fit! Relieves that stuffy feeling after eating. Cleanses crevices between teeth, too... assures sweet breath. A simple aid to health! Buy some now! Small in cost but big in benefits! Enjoy it after every meal—millions do!

stirred up all this turmoil. It's up to you to see that these people get where they want to go."

Now, assisting the sergeant, Hammond was on the rounds of a final check-up. The trip to the Stikine was to start in the morning. Fur-trimmed parka hoods drawn close about their faces, against the below zero weather, they slipped and scrambled along one of the many trails which led through a maze of shacks and tents. Afternoon was blending into dusk.

"Where to?" asked Hammond. "I thought I'd drop by and see Around the World Annie."

"Didn't you say you'd checked up on her?"

The sergeant laughed. He was a pleasant-featured man with an air of weathered amiability.

"Yes, I guess I've got to let her go in. What's to prevent it? She's not going to stop on Canadian soil—she knows perfectly well that the Big Moose takes a long bend nearby Sapphire lake and extends almost to the Alaskan border. Once across that and she can set up any kind of an establishment she wants. The

The Sergeant halted before one ice fringed tent.

United States authorities aren't going to send men over a passless mountain range just to police a few miles of territory. She's in the clear on that; I want to see her about another matter."

"Mind if we stop by the post office first?"

The sergeant, his dark eyes twinkling in their frame of wolf fur, glanced at the letter in Hammond's hand.

"Wondered what kept you so long," he mused. Then, "The daily news, eh?"

The sergeant stamped his moccasined feet while Hammond mailed his letter, and brushed a mittened hand across his mustache, white with frost. They began to move. Suddenly the sergeant halted before an

ice-fringed tent and called "Annie!" Around the World Annie glanced out, invited them in and shouted a command:

"Hey, some of you girls! Unsprawl yourselves and give these gentlemen sitting room on one of these cots."

"Don't trouble yourselves," said the sergeant. "Can't stay long."

Nevertheless, the girls obeyed, by a casual sort of shifting process which left one cot unoccupied. Sergeant Terry slipped back the hood of his parka. Hammond went to the tin stove, and stood with his back to it.

(To Be Continued)

The Paper Industry

One Of The Largest In The World Started In China

In the year 75 A.D. a man sat at the foot of a tree and watched a wasp building its nest. A thought was germinated, and out of it developed the paper industry—one of the largest industries in the world to-day. The man was Tsai Lun, the inventor of paper. He made his first sheets of paper from fibrous pulp obtained from the bark of the mulberry tree, and later progressed to making paper from old fishing nets and rags.

For 650 years the Chinese were the sole makers of paper, and they realized the immense importance of their invention, keeping the art a secret for nearly seven centuries.

In the middle of the eighth century, when the Chinese invaded Turkestan, the Arabs captured a number of professional papermakers, and forced them to disclose the art in order to avoid slavery. Mills were established, and Samarkand became the centre of the world's paper industry. The Arabs took the art with them to Europe, but it was long before it found its way to the various countries. A large number of mills were eventually established in Italy in the fourteenth century, and this paved the way for, and gave impetus to, the invention of printing.

To-day China has to import her paper from abroad.—China Digest.

Wanted To Be Blacksmith

But Lord Baldwin Was Three Times British Premier Instead

Lord Baldwin wanted to be a blacksmith when he was a boy. Also when he had been six or seven years in the House of Commons he said to himself: "I am no use to man or God in this place and I am going to get out of it." He never became a blacksmith, but he made a fortune in the iron and steel business; and when he left the House of Commons he had been three times Prime Minister.

When a thousand of his friends and former constituents at Bewdley in Worcestershire recently presented him with some valuable old tapestry and an illuminated address he told them of a blacksmith named Ephraim he knew in his boyhood. "Eph was a famous smith," he said "and I always used to envy him his job. It was a man's job. But as the fates would have it, I was to find another kind of man's job, that took no less patience, dealing with material hardly less malleable."

Woman Leads Band

Composer Started Very Successful Career Quite By Accident

It is still unusual in England to see a woman conducting an open-air orchestra. But Canadian visitors to London will have the opportunity this summer. Miss Avril Coleridge-Taylor, who is the first woman to conduct a band in Hyde Park, will be busy. Probably Miss Coleridge-Taylor is the first woman in England to tackle such heavy jobs as the conducting of municipal orchestras or military bands. She started off on this career by accident. She went to a seaside resort to supervise the rehearsal of one of her compositions, took the baton for a moment and conducted so well the conductor invited her down to take his place on the day of the concert.

Its First Wedding

Although more than 100 years old, Sutherland's River, a small district near New Glasgow, Nova Scotia, had its first wedding in July when Christine Jean Powell and Raymond MacDonald of Trenton were married by Rev. Alexander Mills of Thornburn.

BEE HIVE Syrup Is the Ideal sweetener on your morning cereal because It is easier to digest.

TRY IT TOMORROW

A Worth-While Address

Given By Lord Tweedsmuir At Edinburgh University Convocation

A new Chancellor was installed at Edinburgh University a few weeks ago. His address to convocation was one which any Scot would be proud to hear, any Scot proud to make. (Scots are adepts in the arts of hearing and making addresses). This one was now grave, now witty—as when it praised the Cambridge toast, "God bless the higher mathematics and may they never be of the slightest use to anybody!"—but always sound in the depth and beauty of its phrases:

"I hear to-day from many quarters foolish jeremiads about the younger generation; jeremiads which are not deep calling to deep, but shallow moaning to shallow. We are told that they lack the enterprise, the stamina and the fortitude of their fathers. That I believe to be wholly untrue. I have always regarded my own undergraduate generation as vigorous and enterprising, but it seems to me that the present generation has a physical audacity which would have left us gasping."

The new Chancellor is known to all lovers of good tales, well told in robust prose, as John Buchan. He is sometimes known as Lord Tweedsmuir, Governor-General of Canada.—New York Sun.

More Than Brains Needed

German University Students Must Also Qualify As Athletes

It is announced from Berlin that students taking examinations for all German universities must:

Be able to run two miles in 13 minutes; jump 13 feet, six inches; throw a 16½ weight eight yards; and swim 54 yards, breaststroke, in 60 seconds.

Imagine a Goethe up against a physical test of that description, or a Handel or a Beethoven...

Oh, reductio ad absurdum, fancy imposing those "matriculation" conditions upon two of their most prominent authors, the ponderous Goering or the crippled Goebbels!

But that, of course, is the absurd essence of Nazi-ism: not what its leaders could or should do, but what the rank-and-file must do.—Halifax Herald.

A meteorite which fell near Santa Cruz in Mexico, shook the earth so much that passengers in a train for Mexico City thought that it was an attempt by rebels to blow up the railway line.

The Importance of Price

To the wheat producer the price of his product is a matter of first importance.

That is why the Alberta Wheat Pool fights so strenuously for price protection. Single-handed amidst the trade, it has striven to place the wheat price question in its proper light before all Canada.

In such a campaign it needs support and encouragement from the farm population.

This can best be done by delivering grain to—

"Captains Courageous"

—Kipling's Great Epic of the Sea

One of the great sea stories of modern literature, Rudyard Kipling's thrilling saga of the Gloucester fishermen, comes to the local screen this week with M.G.M.'s picturization of "Captains Courageous," with Spencer Tracy, Freddie Bartholomew, Lionel Barrymore and Melvyn Douglas in the leading roles. The filming was actually taken off the Grand Banks.

Freddie Bartholomew plays a wholly American boy, a wide departure from any of his previous roles. As 13-year-old Cheyenne he is the son of an American millionaire and has never known the meaning of work and worthwhile effort. Bound for Europe on a super-liner he falls overboard off the Newfoundland banks and is picked up by a fishing dory named by Spencer Tracy, the latter playing the part of Manuel, a Portuguese fisherman.

The boy is taken to the fishing schooner "We're Here," captained by Lionel Barrymore as Capt. Disko. His tale of being a millionaire's son is attributed to the shock of having fallen overboard. He is put to work and gradually his regeneration begins. The hardy, honest Gloucester fishermen make a man of him. Mickey Rooney appears in the cast as Dan the captain's son.

Not the least of the film's features is the fact that Spencer Tracy sings for the first time in his career on the screen and will be heard in sea chanteys both solo and in chorus with the crew.

Former Didsbury teachers who are now on the Calgary teaching staff are assigned to the following schools: A. Russell, Normal Practice, Grade IX; A. J. E. Liesemer, Crescent Heights High School; O. S. Geiger, principal, Cliff Bungalow; Miss A. M. Jackson, Bridgeland; Miss E. Jagoe, Hillhurst Jr. High; Miss Doris Brown, Manchester.

School Fair Will Be Held At Community Hall

The annual Community Hall School Fair will be held Wednesday next, September 7th. There will be exhibits of live stock, poultry, grains, grasses and vegetables, together with exhibits of school work, domestic science and manual training.

During the afternoon there will be a good program of sports and the relay race between the school teams for the cup.

Six schools, Rosebud, Neapolis, Gore, Grand Centre, Mona and Jutland are taking part in the fair and it is expected that the entries will exceed those of previous years.

There will be an admission fee of 25c for adults with children free

NOTICE

Re. Carcasses of Dead Animals and Sleeping Sickness.

In order to prevent the spread of disease the Provincial Health Regulations provide that all dead carcasses of animals be destroyed by either burning or burying.

This regulation should be strictly adhered to during the present epidemic of sleeping sickness.
